

DEFINING THE
BUSINESS OF WATER

Leak detection and repair

Water leaks can be costly. Undetected or unresolved leaks can cause large water bills, reduced water pressure and physical damage. We can help you fix leaks and valves, resolve plumbing issues and clear blocked drains.

Trade effluent

We can work with you to obtain consents or improve the way you deal with the waste you produce. Cost-effective treatment and disposal can mean significant cost savings for your business.

Castle Water does not have contractual responsibility for the delivery of services carried out by framework partners.

CASTLE
WATER

We can introduce you to a comprehensive framework of specialist and added value services to help you:

- ✓ save water
- ✓ cut costs
- ✓ meet environmental commitments
- ✓ build resilience
- ✓ support sustainable growth
- ✓ keep customers and stakeholders happy

Products and services

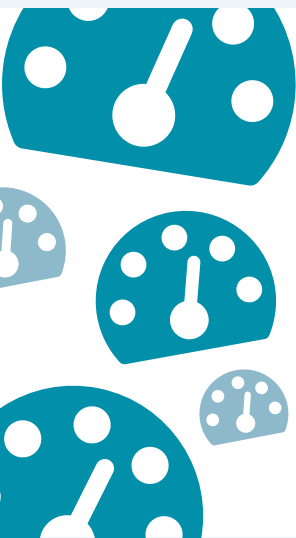

Water supply continuity and contingency planning

Contact us to find out more about contingency planning for water outages, emergency supplies, temporary water for events and assured response contracts.

Automatic meter reading (AMR)

Regular performance reports will help ensure that you are not paying more than necessary for your water. Spotting issues quickly will prevent water loss, avoid unnecessary costs and reduce disruption or risk to your business.

Water efficiency audits

We can help you understand your water usage so you can reduce costs. Water reduction strategies can help make sure you are as resource efficient as you can be.
