CHARGING POLICY

Published below is a schedule of Bournemouth Water's wholesale charges for the provision of water and services. They come into effect on 1 April 2020.

In addition, for continuity and ease of reference for licensees, we have separately published our wholesale charges in the 'standard schedule' format previously required by Ofwat.

'Licensee' is the holder of a water supply licence and/or a sewerage licence granted by the Water Services Regulation Authority (Ofwat) under section 17A and/or under section 17BA of the Water Industry Act 1991.

Charges are set in accordance with revenue control limits determined by Ofwat. To comply with Condition E of our licence to operate, charges must not show undue preference to, or discriminate against, any class of person.

FOURTH SCHEDULE

Special Agreement Wholesale Charges 2020/21

The Water Industry Act 1991 allows water and sewerage undertakers to enter in to a special agreement instead of charging in accordance with a charges schedule. This agreement specifies the charges for supplies of water and sewerage services to business premises. These charges may be different to those laid out in the charges schedule.

There are a number of non-household whole sale consumers where wholesale charges are charged under a special agreement, generally at a discount to the standard wholesale charge. A summary of these agreements is published on our website, bournemouthwater.co.uk.

Searches

Searches are available from the suppliers of wastewater services.

Value Added Tax

All charges contained in this Charges Schedule are exclusive of Value Added Tax (VAT) unless stated.

This section is a description of the VAT liability of charges and is subject to changes in VAT registration and rates of VAT.

The supply of water from the wholesaler to a retailer is subject to VAT at the standard rate. Measured and unmeasured sewerage and sewage disposal charges and trade effluent charges from the wholesaler to a retailer are subject to VAT at the zero rate.

Engineering and construction services

Charges for engineering and construction services, excluding infrastructure charges, are subject to VAT at the standard rate, unless they relate to new construction of dwellings (in which case they are zero rated).

Infrastructure charges are outside the scope of VAT. Charges in respect of construction services/civil engineering services supplied in the course of certain residential conversions, or in the course of renovating certain buildings that have been empty for two or more years, may be taxed at a reduced rate, but only where the work is done wholly within the immediate site of the development.
